2. Recognise the place value of each digit in a two-digit number.

Circle any number that has a digit with a value of sixty.
3. Compare and order numbers up to 100; use $<>$ and $=$ signs.
a) Write these amounts in order of size, starting from the smallest.

5. Use place value and number facts to solve problems.
a) I have 37 p and I give away 12 p. How much money do I have left?

b) What calculation is represented here?

c) Here are 4 digit cards.

Use each digit once to make a total of 100 .

6. Identify, represent and estimate numbers using different representations, including the number line
a) Here is a number line from 0 to 100 . Mark the number 75 with an arrow.

b) Here is a number square with most numbers missing. What number goes in this cell?
